Abstract (en)

[origin: WO03079306A1] Disclosed is a method for following at least one object in a scene, which is characterized by the fact that the time is counted during which an object is at a standstill once said object has stopped moving so as to generate a signaling according to the duration of the standstill position. The object is described by means of a list or a matrix in relation to the direction of movement and the time.
