Abstract (en)
The present invention provides a bag for a body support assembly which can stabilize the curing time by avoiding influence of environmental temperature on the curing time and improve a fitting feeling of the body support assembly. The present invention also provides the bag for the body support assembly which is suitable for use in a seat, a chair or the like. The bag (1) of the present invention is one for accommodating a body support assembly, the body support assembly including a cushioning body being deformable by press, the bag being used by allowing the cushioning body to contact a user's body so as to deform in a shape matching the user's body and maintain the deformed shape. The bag (1) is a pouched body comprising: a front face covering member (2) provided on one side for contacting the user's body; and a rear face covering member (3) provided on an opposite side; and a heat insulation layer (5) and/or cushioning layer (6) is/are provided at least on the front face covering member (2). <IMAGE>
