Abstract (en)

[origin: EP1486598A2] A chain mail curtain or screen has warp and weft threads. The two sides of the curtain are linked by a light-conducting body e.g. glass crystals distributed at various points throughout the screen. Also claimed is a process to fabricate the screen in which the chain mail is first knitted with warp and weft threads. A number of weft threads are then removed, leaving gaps which then accommodate suitable glass crystals.
