Abstract (en)

[origin: EP1487003A1] An automatic reset device (1) for untimely trippings of circuit breakers, residual current-operated devices and electrical safety equipment in general, which includes a mechanism for the automatic actuation of the reset lever of an electrical device that is suitable to automatically reset the electrical device a preset time after tripping; the device includes a thermal actuator (13) that acts on the mechanism when the electrical device has tripped so that the mechanism resets the circuit breaker. <IMAGE>
