Abstract (en)
[origin: WO03075720A1] A device for storing objects, in particular goods, comprising at least one box (3a) for the storage of said objects. The box (3a) comprises an outer enclosure (5), which is detachably mounted by means of insertion on a support (1), and a moveable part (6) joined to the outer enclosure (5), said moveable part (6) being displaceably mounted between an open position and a closed position. The device also comprises an air ventilation unit (12) which is connected to an air duct system (13) enabling air to circulate from the ventilation unit (12) towards the inside of the box (3a).
