Abstract (en)
[origin: WO03080247A1] The invention relates to a device for cooling a sampler (1), which comprises a recipient (2) for receiving at least one sample flask (3) or a sample container which can be placed in the sample (1), a cooling unit and a condenser (4). The recipient (2) for receiving the sample flasks (3) or the sample container is connected with the condenser (4) of the cooling unit. The recipient (2) is at least partially filled with a transfer medium (5) and the sample flasks (3) or the sample container is/are placed in the transfer medium (5) when the sampler is used.
