Abstract (en)

[origin: WO03078278A2] The invention relates to a method for the commissioning of goods, whereby commissioning containers are transported in a computer-controlled manner to commissioning areas and the locations and quantities of goods to be commissioned are shown graphically. The method according to the invention is characterized in that a warehouse management control unit (LVS) transmits commissioning data to a material flow control computer (MFR), the material flow control computer controls the destination of the commissioning containers in such a way that said containers are transported in the commissioning areas in which the goods to be commissioned are located, the material flow control computer sends activation telegrams to the control computer (PBL) and said control computer executes a display control depending on the activation telegrams. The invention also relates to a device for implementing the inventive method.
