Abstract (en)  
[origin: WO03078664A1] The invention relates to a method for producing semi-finished goods and intermediate stages in the production of leather using one or more organic polyelectrolytes. The inventive method comprises at least one of the following steps: (a) adding one or more polyelectrolytes and 0.07 wt. % lime, in relation to the salt weight, directly before or in the lime pit, (b) adding one or more polyelectrolytes prior to or during decalcification, (c) adding one or more polyelectrolytes prior to or during descaling, (d) adding one or more polyelectrolytes and a total of between 0 - 3 wt. % alkali or alkaline earth salt, in relation to the pelt weight, directly prior to or during the pickling process.
