Abstract (en)

[origin: WO03069070A1] The invention relates to modular elements composed of granules made of various materials with elastic memory and/or being able to permanently setting when mutually glued shaped as a cube and/or other geometric shapes, adapted to make protective barriers with a suitable length in compliance with installation areas. Such manufactured articles with different shapes, weights and sizes provide for a set of lightening holes 1 in order to change their impact absorption capability.
