Abstract (en)
[origin: EP1489212A2] In a press roller apparatus (2) including two or more press rollers (6) disposed so as to be contactable with and separatable from a surface roller (4). Between one press roller (6) and the other roller (6), there is interposed a transmission member (7). The transmission member (7) transmits the separating movement of one press roller (6) from the surface roller (4) to the other press roller (6) to thereby separate the other press roller from the surface roller (4). <IMAGE>
