Abstract (en)
[origin: EP1489366A1] The equipment has a burner (4) with an injection device (5) extending towards a base in an axis of a combustion chamber (6). A lower part of the chamber is connected with a series of fire tubes. An inner space of an envelope is divided into two parts, separated in height by a partition for creating two superposed chambers (12, 13). The upper chamber (12) is maintained permanently at high temperature.
