Abstract (en)

[origin: WO03082030A1] This invention relates to a method for manufacturing a top loaded cigarette filler, whereby a base layer on basis of a fine fraction of tobacco and cellulose fibres is composed, which base layer is provided on one side with a fraction of course tobacco after which the total is subjected to a drying treatment. The invention further relates to a top loaded cigarette filler constituted of a base layer of a fraction of fine tobacco and cellulose fibres and a top load of a fraction of course tobacco.
