Abstract (en)
[origin: WO03081174A1] The invention relates to a range finding device, particularly a hand-held laser range finding device, comprising an operating unit (12), which is situated inside a housing (10), and a first aiming unit (14). According to the invention, the first aiming unit (14) is provided, at least in part, as a single piece with a protective unit (16) that protects the operating unit (12).
