Abstract (en)

[origin: EP1492079A1] Method for output of a digital document to an output unit controlled by an output computer. According to the method monitor (MP) and output (BP) unit profiles are stored in the output computer and used with a color-management free application (A) that interacts with a program module (PM) installed in a color transformation unit (CMM) that provides color management functionality for converting an electronic document (D) prior to its printing on the output unit (B).
