Abstract (en)
[origin: EP1492140A1] The device has a main contacting device (3,4) for making an electrical connection between an input and an output of the device and a test button device (6) with a button element for opening the contact of the main contact device and for closing a test current circuit. A spring element (7) that also has the function of a contact element is integrated into the button element for resetting the button element.
