Abstract (en)  
[origin: WO03043451A1] A pipe and a filter assembly (10) for the pipe including in combination a heat arrester member for positioning between a burning chamber (16) adapted to be loaded with and to burn a smoking product, typically tobacco, and a stem assembly in communication with said burning chamber (16), said stem assembly adapted to house, a filter member (12c) wherein in operation, heated gases and/or burning embers drawn from the burning chamber (16) as a smoker draws on the stem assembly will be arrested by the heat arrester member and wherein heat is absorbed and dissipated by the heat arrester member, thereby protecting the filter (12c) from said heated gases and burning embers.
