Abstract (en)

[origin: WO03085616A1] The invention concerns a multimedia mobile terminal comprising a processor (11), a programme storage (12), a data storage (13), and a voice-activated remote-control device including a microphone (17), a voice recognition module (14), a lexical analyzer (15) and a communication module (16) adapted to control at least one household equipment (27) via a home gateway (21), through a wireless link (20), a manual input member, a display screen (18) and a loudspeaker (19). The invention also concerns a method for remote control of a home gateway using a multimedia mobile terminal.
