Abstract (en)  
[origin: WO0208370A2] A method of removing cooked-, baked-, or burnt-on food soil from cookware and tableware comprising washing the cookware/tableware in an automatic dishwashing machine in the presence of an organic solvent system having a wash liquor concentration of from about 100 to about 5000 ppm. The method includes the storage and delivery of organic solvent compositions and dishwashing detergent composition from multi-compartment containers. The method provides excellent removal of stubborn soils which are very difficult to remove in a conventional automatic dishwashing process. Automatic detergent dishwashing compositions and hard-surface detergent compositions comprising organic solvent systems for the removal of cooked-, baked-, or burnt-on food soil from cookware and tableware are also disclosed.
