Abstract (en)

A container inspecting machine is provided with a man-machine screen interface (17) which can be switched (25,26) to one of a plurality of different back lights (28,30) or patterns so that an operator can define any one of these back lights (28,30) on the man-machine screen interface (17) as a desired back light (28,30) for inspecting a transparent container.
