Abstract (en)

[origin: EP1494254A1] Element (1) comprises either an adhesive connection (5) or packing material for fixing connecting pieces (2, 3) to an insulating tube (4). The adhesive connection is formed by cone inserted into one end of the insulating tube and guided from a casing surface (7) onto the inner surface (8) of the insulating tube and formed by a counter cone (9) inserted into one of the connecting pieces. A gap is formed by the cone and counter cone and is filled with adhesive. Independent claims are also included for the following: (1) process for the production of the power transfer element; and (2) device for producing the power transfer element.
