Abstract (en)

[origin: WO03087687A1] The invention relates to a drying cabinet (1) comprising a cleaning device (10) which can be inserted into the inner compartment (4) thereof. According to the invention, the cleaning device (10) consists of a carrier (11) which is arranged on the inner bottom of the drying cabinet (1) and comprises a channel (15) which is located inside the carrier. A plurality of horizontal carrier arms (12) comprising a cavity (16) which is connected to the channel (15) are fixed to the carrier. One such carrier arm (12) is arranged above each heating plate (5) of the drying cabinet (1). Each carrier arm (12) comprises a spray arm (13) which can be horizontally rotated about an axis A. Each spray arm (13) has a number of nozzles (14). The carrier (11) and the drying cabinet (1) are also provided with means (20, 21, 22) for supplying a cleaning medium to the channel (15). In this way, a drying cabinet (1) comprising a cleaning device (10) with an improved cleaning action is created.
