Abstract (en)

[origin: WO03087751A1] The invention relates to a control device (1) for non-positive connections, especially screw connections. The device comprises two force application elements (2a, 2b) and a measuring element (3) arranged therebetween. The measuring element is at least partially provided with a layer (4) having a force sensory effect. The surface of the layer is provided with elevations (5a, 5b) for receiving a force applied by the force application elements.
