Abstract (en)

The present invention discloses a suction head (100) for a vacuum cleaner, including a casing (102) having a suction port (101) for sucking alien substances from the floor, an agitator (104) rotatably installed inside the suction port (101), a pluralit of brushes (104b) being arranged on the agitator (104) in the length direction, and an agitator driving unit for driving the agitator to perform reciprocating rotation in a predetermined angle range. The suction head for the vacuum cleaner improves cleaning performance of the vacuum cleaner. <IMAGE>
