Abstract (en)  
[origin: EP1495786A1] Method has front (2) and rear (3) guides fitted to the ski with threaded fasteners (4) positioned in a set pattern irrespective of the boot size. Toe (12) and heel (22) bindings have a sliding fit on guides and are secured into optimum positions by threaded fasteners (30) screwed into the guides. Front and rear guides have an overlap to allow for flexing of the ski. Bindings are held on guides by grips (13, 23) which provide lateral flexibility.
