Abstract (en)
[origin: EP1495986A1] The package has a container with an opening delimited by a peripheral flange. The container is closed by a cover that includes a peripheral flange (3), a sealing disk (4) with a holding part (5) positioned at its periphery, and a line of least resistance (10). The line has a discontinuity at a level of which it extends locally in a direction of centre of the sealing disk near the holding part.
