Abstract (en)
The present invention provides a container with double lids, which has a container body (10) and a lid (20) unit to close an open top of the container body. The lid unit of the container includes a locking lid (25) which is made of a soft material and has a predetermined shape to correspond to an edge of the open top of the container body, with an opening provided at an inside part and a rim-shaped receiving part (26) provided on a lower end to receive therein the edge of the open top of the container body; and an observing lid (30). The observing lid includes a transparent cover plate (31) to be placed in the opening of the locking lid, and a coupling part (32) extending outward from an edge of the cover plate and to be inserted into the receiving part of the locking lid. The container allows a user to observe contents of the container through the observing lid.
