Abstract (en)

[origin: EP1496181A1] The device has an articulation leg (1) engaged in a slit that is formed transversally in a coupling plate (4). A profiled groove presented in the plate perpendicular to the slit receives a vertical branch of a fixation leg (2), where the fixation leg is integrated with a door. The plate has a hole for mounting a set screw (5) cooperating in support with the articulation leg.
