Abstract (en)  
An improved support for a venetian blind system has the supports connected to the control shaft in such a way that the louvres are set horizontal whenever the blind is pulled up or down. This eliminates the dark phase experienced produced by conventional blinds. The selected inclination of the louvres is automatically set at the end of the vertical movement of the blind. The attitude of the louvres remains constant during any change in direction of the vertical movement.

Abstract (de)  
Die Lamellenstore mit einem Behang aus einer Mehrzahl von Lamellen, welche durch Tragmittel miteinander verbunden und durch eine Aufzugswelle mit einer Wippvorrichtung vertikal verfahrbar und schwenkbar sind, sind während dem vertikalen Verfahren beim Absenken und Hochziehen des Behangs im wesentlichen horizontal ausgerichtet sind.
