Abstract (en)
The light has a screen (E) located in front of a lamp and an exit glass, and made up of transparent or translucent material. The screen has a set of patterns (3) ensuring a spatial distribution of the light energy in localized zones (4) at an exit of the screen by direct transmission and/or internal reflection, while transferring the light energy entering the screen. An independent claim is also included for a motor vehicle equipped with a signal light.

Abstract (fr)
Le dispositif lumineux comporte une écran (E) placé devant la lampe et une glace de sortie. L'écran (E) est en une matière transparente ou translucide, et comporte un ensemble de motifs (3) permettant d'assurer en sortie, par transmission directe et / ou par réflexion interne, une répartition spatiale de l'énergie lumineuse dans des zones localisées (4), quasiment ponctuelles, en transférant l'essentiel de l'énergie lumineuse entrant dans l'écran. <IMAGE>
