Abstract (en)  
[origin: EP1496304A1] The light has a screen (E) located in front of a lamp and an exit glass, and made up of transparent or translucent material. The screen has a set of patterns (3) ensuring a spatial distribution of the light energy in localized zones (4) at an exit of the screen by direct transmission and/or internal reflection, while transferring the light energy entering the screen. An independent claim is also included for a motor vehicle equipped with a signal light.
