Abstract (en)

[origin: GB2387331A] The invention provides an absorbent article comprising: a continuous cover sheet having a plurality of projections formed therein; and a sterile hydrogel layer in contact with the cover sheet such that said projections extend through the hydrogel layer. The cover sheet can be removed to provide an apertured hydrogel sheet suitable for contacting exuding wounds. An absorbent foam layer + plastic backing may be included. The invention also provides methods of making such absorbent articles.
