Abstract (en)
[origin: WO03089791A1] The invention relates to a vacuum pump (10) comprising a pump unit (14) and an operator unit (12), which is connected to the pump unit (14) to control the same and is located at a distance from said pump unit (14). The pump unit (14) and the operator unit (12) each have a transceiver module (20, 22) for the bi-directional wireless transmission and receipt of control and operating data. The pump unit (14) and the operator unit (12) are exclusively interconnected in a wireless manner.
