Abstract (en)

[origin: WO03087999A2] A valuation system for determining the impact of a modification in the nutrient composition of an ingredient or the impact of a new ingredient on the value of the ingredient and the value of competing ingredients. The system can include a repository of information related to potential markets that is incorporated in the evaluation to provide a valuation. This system allows analysis of multiple formulations of animal feed utilizing the new or modified ingredient in a designated market to determine projected usage and value.
