Abstract (en)

[origin: EP1498042A1] In a machine for production of footwear, the means for supplying the glue (24) onto the insole (23) comprise a plate (19) which is movable between a rest position and an operative position, in order to supply the glue along the contour (27) of the front portion of the insole (23), and one or more movable glue suppliers (22) in order to supply the glue along the contour (27) of the insole (23). The rest position of the supplier plate (19) is such as to permit advance of at least one of the said suppliers as far as the front end (31) of the insole (23), without interfering with the supplier plate (19). <IMAGE>
