Abstract (en)
[origin: US2006248648A1] The invention relates to a treatment couch for accommodation of a patient, comprising a lying surface (1), for the patient and a base (4), for supporting the lying surface (1) on a floor (6), whereby the lying surface (1) may be adjusted relative to the base (4) along a Y-direction parallel to the longitudinal direction thereof, a horizontal X-direction perpendicular thereto and a vertical Z-direction, in order to adjust the lying position of the patient, characterised in that, on adjusting the lying surface (1), the same is pivoted about a rotational axis (13, 19) perpendicular to the Y-direction. The invention further relates to a treatment couch for accommodating a patient provided with a headrest for the head of the patient, whereby a drive for the vertical adjustment of the headrest is inbuilt, such that the headrest may be removed as a module with the drive.
