Abstract (en)

[origin: EP1498537A1] The frame of the washing machine (2) has a conical portion with a hole, trapped between the clamping member (3') and the conical head (6) of the separating piece (5). The clamping member engages a screw thread on the outside of the separating piece. The screw (7) passes through a plain bore in the separating piece and engages with the sides of a cavity (8) in the soap holder (1).
