Abstract (en)

[origin: EP1498656A2] The illumination device has a housing device (8) and a circuit board (1) fitted with light emitting diodes (2) arranged inside the housing device. Several illumination devices can be arranged in modular form longitudinally and/or over an area, whereby the circuit board can be fitted with light emitting diodes at variable distances. An independent claim is also included for the following: (a) a tunnel illumination system.
