Abstract (en)
[origin: WO03089094A2] Disclosed is a toy figure, particularly a functional doll, comprising a central torso (11) which is provided with a body shell (35) surrounding a hollow space (34) inside the torso (11) and several extremities such as a head (12), arms (13, 14), and legs (15, 16), which are arranged on the torso. At least the arms (13, 14) and legs (15, 16) are made of a soft elastic material. A functional unit (17) is integrated into the toy figure for ensuring one or several functions that are typical of a functional doll. The arms (13, 14) and/or legs (15, 16) and/or the head (12) are pivotally mounted on the torso (11) via fluid-tight joint connections (18 to 22).
