Abstract (en)
[origin: WO03093162A1] A pressurised liquid dispenser, primarily for dispensing beer, in use, comprises an inner chamber (22) for said liquid, an outer chamber (15) for pressurised gas, the outer chamber surrounding the inner chamber, a casing (13:13a) of the inner chamber being of plastics material and connected to a casing (10:10a) of the outer chamber by ribs/webs (25:25a). A gas pressure regulator (24) is housed within the dispenser to reduce the pressure of the gas from the outer chamber to the inner chamber, and maintain the lower pressure in the inner chamber as liquid is dispensed therefrom.
