Abstract (en)  
[origin: WO03081353A1] The invention relates to a system for recording information pertaining to components (10), comprising a device (21, 22, 23, 24) for storing information pertaining to the components (10) and means for controlling the components (10) based on the stored information. The information contains characteristic data of individual components (10), and means are provided for assigning the information to individual components (10). The inventive system is characterized in that the device for storing information pertaining to the components is at least a data transponder that is arranged on the component (10).
