Abstract (en)

[origin: EP1500437A1] The device has a container (10) elongated along a longitudinal axis (X). A filling pump (12) has an activation axis (Y) and removes a product from the container. A flexible pipe (25) connects a nozzle (4) to the pump and is arranged such that it deforms itself when a push button (3) is activated. The activation axis of the pump extends obliquely with respect to the longitudinal axis (X) of the container.
