Abstract (en)

[origin: EP1500472A1] The apparatus has cannon (3) with a guide point (4) to retreat a supply magazine (5). The magazine receives a loader (50) of nail or hook type points (2) and introduces a point (7) in the cannon. A safety shoe (8) moves to a safety position and prevents the retreat of the guide point, in the absence of the point (7) in the cannon. A visual indicator (12) indicates a safety position of the shoe.
