Abstract (en)
[origin: EP1500606A2] The multi-component cartridge has a co-axial outlet (3) with an outer (4) and an inner (5) tube, a detachable cap, and a seal. The seal has at least one sideways protruding sealing edge which is located on the inner and/or outer side of the inner and/or outer outlet tube and/or on the side of the cap's sealing member facing the outer and/or inner side of the inner and/or outer outlet tube. The cap has two sealing members defining an annular groove for the inner and/or outer outlet tube.
