Abstract (en)

[origin: EP1500773A1] The window with a forced ventilation, from the outer side (8) to the inner side (9), has an air flow limit in the rabbet chamber (7). It has a base body with a ventilation flap (12) which swings around an axis (15). The base body has a ratchet lock to fasten it in a holding groove (5). The flap axis lies within the groove. The base body has a limit stop edge (16), which is struck by the flap with surface bumps to define the air flow.
