Abstract (en)

[origin: EP1500900A1] The sighting device has a periscope whose viewing head (2) can be rotated through 360[deg] on the roof plate (1) of the vehicle or the tank turret and a platform (3) carrying at least one sensor (4-4.1) designed to be movable from a working position above the viewing head to a lower rest position in which it is in front of, behind or next to the viewing head and resting on the roof plate.
