Abstract (en)  
[origin: WO03095157A1] The invention relates to a shaving appliance comprising at least one rotating flexible strip (12) which is provided with a plurality of bezels, is guided in a guiding channel (3) in a cutting section (4), and is driven by a motor (10) in the longitudinal direction. The quality of one such shaving device is significantly improved by the fact that the guiding channel (3) is flexible in the cutting section (4).
