Abstract (en)

[origin: WO03095284A1] The invention relates to process connections for safely operating safety and security installations, particularly for triggering signal lamps (11.1, 11.2, 11.3), points mechanisms (13), axle counters, clear-signaling devices, speed metering devices, train stops, and for secure contact inquiries. A component-reduced design is characterized by functional modules (3), the functionalities (Fkt_1, Fkt_2, Fkt...) of which are common to several different process connections.
