Abstract (en)
[origin: WO03095334A1] A shave gel is disposed within a container having a container body defining a space for storage of the product and a valve in fluid communication with the space. A hollow stem (206) is disposed in fluid communication with the valve and includes an exterior end (208) that has at least one side opening therethrough. The valve is actuatable to dispense product through the side opening.
