Abstract (en)

The inventive preform (2) which is used in the method of producing a composite component (3) comprises high wear resistant particles (4) which are placed on zones that need to be wear resistant, which are brought together without an organic or an inorganic binder, and a container (1) wherein the particles (4) are placed. This preform (2) is developed by bringing together high wear resistant particles (4) without using any binders. <IMAGE>
