Abstract (en)
[origin: EP1502872A1] The pot has a container (2) with a neck (6) delimiting a distribution opening (7). The container delimits a distribution opening (9) to be changed from a closed position to a disengaged position according to a movement of a cover, so that a product is delivered through the openings according to respective distribution modes. The opening (9) is delimited by an edge (18) connected to an edge (8) delimiting the opening (7). An independent claim is also included for a method of utilization of a cosmetic or care product distribution device.
